After your Support ID and serial number have been verified, the Support staff will create a trouble ticket for your issue in the Celestix Support database.

You will be asked to provide or verify some of the following information. If it is not possible to provide this information, Celestix may be hindered in the ability to bring resolution to an issue in a timely fashion and will prevent Celestix from operating within the stated service level agreement.

You will be asked to provide or verify some of the following information. If it is not possible to provide this information, Celestix may be hindered in the ability to bring resolution to an issue in a timely fashion and will prevent Celestix from operating within the stated service level agreement.

In the event of incomplete and/or inaccurate communication information and/or inaccurate/incomplete problem description entered into the web form, Celestix will not be held liable for support which extends beyond any stated service level agreement and time windows. A Celestix technician will contact the customer via email or phone once a valid support contract has been validated.

All electronic mail transactions to CSC regarding this issue must be sent using a REPLY back to the technician handing the issue. This will allow all email correspondence to be tracked until completion of the issue. (Important: CSC has designed its system to speed service to customers. Sending an email to CSC without using the webform (initially) and a REPLY for ongoing correspondence could result in a significantly longer turn around time for your support issue).

If you do not receive an email reply acknowledging receipt of your email request for support within two (4) hours, you should assume that the email link is down, and proceed to make a voice call to CSC.

In order to expedite the processing and resolution of individual issues, and to maintain and improve Celestix service quality, it is essential that the fields of the webform are filled out as completely as possible.
